The implementation of operations management is a vital component of improving business performance. Outsourcing, technology & quality management have a significant role in achieving business objectives. Qantas is an Australian airline who competes in the aviation industry. They have one the strongest & most successful airline company in Australia which is a result of effective implementation of strategies. Business success is the ability for a business to achieve set goals and objectives to maximise profits & quality.

Qantas outsource staff, IT, ~~[illegible]~~ knowledge & resources both on shore and off shore. Outsourcing is the external use of resources to complete specific business activities at a lower cost & higher quality. Qantas are able to achieve high quality and lower expenses through the ~~[illegible]~~ strategy of outsourcing, which is a significant contributor to its recorded 1.03 billion dollar profit in 2015. Outsourcing allows skilled and pre trained staff to work for Qantas. They have higher qualifications & advanced knowledge to perform quality services. Qantas outsourced their engines services to a Malaysia business which ~~[illegible]~~ got rid of 360 staff. This is a vital contributor to lowering cost for the business. This outsourcing in 2013 saved 160 million dollars on machinery & staff that would service the engines of planes. Evident from outsourcing

their e plane servicing meant that Qantas did not need to spend money on training their staff. It reduced expenses by 17% when they made this change of outsourcing to Malaysian Outsourcing increased the quality of Qantas by reducing the defects or engine problem in the plane which lead to less delayed flights which increases the customer satisfaction and performance of the business. For Qantas to meet their objective of cost and quality it was successfully achieved through the outsourcing of staff & technology, it reduced the cost by 17%. it continued to record profit of 1.03 billion and went that 360 staff were lost their jobs. It is clear that outsourcing plays a significant role in achieving set objectives and overall performance of business.

Technology is the scientific use of knowledge & data which helps improve business success by reducing cost, increasing quality, becoming more dependable & flexible. Qantas utilize both leading edge & established technology to improve business success. In 2013 Qantas introduce self check in systems which meant that they could save money as well as increase quality & dependability. Self checking resulted in 660 520 staff becoming redundant in 2013. The leading edge technology

replaced the staff which decreased expenses of Qantas as employing less staff. This implementation of technology reduced cost of employment by 44%. 34% which is a vital factor of achieving cost goals for Qantas. It also meant that customers could quickly check in before flights with out being served by a staff member. The the Self service meant that in high demand periods such as holidays the technology was able to streamline Qantas in dealing with demand. It decreased cost and increased departure and & quality. Qantas implantation of technology meant that they improved performance as they ~~developed~~ used the technology to make the quality of planes with new T.V system in place thrilling the customers satisfaction and delivered the ultimate flying ~~experience~~ experience. Another example of how Qantas achieved theirs success is the research of weight reduction & more & efficient fuel they could use to decrease cost & increase efficiency. Qantas were able to reduce weight by 12%. on planes with the use of technology. In 2014 Qantas introduced their bio-fuel which was more fuel efficient & environmentally sustainable. The establishment of new bio fuel ~~used~~ lead to 60% decrease in carbon foot print. This improves the public image of ~~Qantas~~

Qantas as well as managing efficiency & reducing costs. They were able to save 1.6 million dollars of ~~a~~ fuel ~~&~~ ~~expenses~~ expenses after reducing the weight & 1% fuel used. This is clearly a vital component for Qantas to achieve cost goals & improving efficiency / performance. Also Qantas used established technology when they were not the first to purchase. Also, They reduced risk of having expenses as the can were able to see the performance & quality of plans through other airlines. They used this established technology to minimise risk. This shows how they use technology to decrease cost in any way that leads to business success.

Quality management is the ~~assurance~~ certainty that the ~~business~~ business will produce their service or product that meet the standards & expectations of both business & customers. Quality management ~~&~~ ~~focuses~~ ensures that Qantas deliver quality services to their customers with training development programs & inspections ~~on~~ on qualifications & skill & of staff. It is a vital ~~part~~ component for Qantas to achieve business success as it ensures they produce the highest quality ~~for~~ service that are needed to be both flexible & dependable. Quality control is ways that Qantas have programs that
